Contact Information	LEAP Bocconi University Via Röntgen n. 1 Milan 20136 (ITALY)	devis.decet@unibocconi.it https://devisdecet.com Citizenship: Italian
Fields	Primary: Development Economics, Environmental Economics Secondary: Political Economy, Public Economics	
Employment	Bocconi University, Postdoctoral Researcher Laboratory for Effective Anti-poverty Policies (LEAP)	2025-
Education	Ph.D. Economics, Northwestern University - M.A. Economics, 2020	2025
	M.A. Economics, University of Bologna - Visiting student (BESAP program), UC Berkeley, 2018	2018
	B.A. Economics and Management, University of Trento - Visiting student (Erasmus program), University of León, 2014	2016
Working papers	"Organizing Fiscal Capacity" <i>World Bank 1st Conference on Public Institutions Best Paper Award</i> This paper investigates how the spatial organization of a tax authority shapes fiscal capacity. I focus on the trade-offs between staffing many local offices and consolidating into a structure with tax agents and decision-making power concentrated in fewer, larger offices. Leveraging a reform of the Brazilian tax authority and disaggregated data on tax collection and local office organization, I find that consolidation increased tax revenues by 3.3%. The increase was largest where the reform allowed for more efficient utilization of enforcement and managerial resources. However, the reform led to a divergence in tax revenues within consolidated regions, particularly in peripheral areas farther from their new office and with weaker third-party reporting. My findings suggest that consolidation can lead to efficiency gains but also to larger geographic inequality in tax enforcement. "Water Wars" with Andrea Marcucci We study the relationship between access to water resources and local violence in Africa. Due to limited irrigation, rural communities rely on rainfall, rivers, and lakes for their economic needs. Rainfall scarcity can make access to water from rivers and lakes more valuable, thereby generating conflicts. We explore this hypothesis by integrating granular data on the river network with high-resolution data on rainfall and violent conflict events in Africa from 1997 to 2021. We find that reduced rainfall in a location leads to more conflict in neighboring areas that are water-rich and located upstream along the river network. These are the sites that exert more control over the river flow. The effect is more pronounced in regions experiencing a long-term decline in water presence. Consistent with the proposed mechanism, conflicts concentrate in areas with higher returns to water access, as proxied by the presence of agricultural production. Additionally, the impact is more pronounced in regions with unequal water distribution among ethnic groups, highlighting how cooperation costs are an important friction preventing peaceful sharing of water resources. In terms of	

policy responses, we find that the effects tend to be mitigated in countries with stronger democratic institutions, better rule of law, higher state capacity and less corruption.

“Child Labour, Human Capital and Beliefs” with Kaman Lyu

Public Policy Research Network 4th Graduate Workshop Best Paper Award

In contexts where child labour is pervasive, household decisions about allocating children’s time between school and work involve a trade-off: current returns from child labour versus future returns from education. This paper tests for the existence of a third factor: future returns from child labour, as parents view farm work as an investment in agricultural skills. We provide evidence on each component of this trade-off in the context of rural Ghana by leveraging four waves of survey data on 5,000 households, exogenous shocks to agricultural productivity, and a vignette survey design to elicit parental beliefs.

Selected Work in Progress

“State Capacity and Environmental Protection” with Marie-Louise Décamps

“Conflict and Environmental Degradation in the Congo Basin” with Marie-Louise Décamps and Ameet Morjaria

Fellowships, Grants & Awards

Dissertation Fellowship, Northwestern University	2024-2025
University Fellowship, Northwestern University	2023-2024
GPRL Travel Grant, Northwestern University	2022
Marco Fanno Scholarship, Unicredit Foundation	2018
BESAP scholarship, University of Bologna	2017
Erasmus Scholarship, European Union	2014, 2017
Merit Award, University of Trento	2016

Presentations

2025: World Bank Public Institutions Conference, Bocconi LEAP, Analysis Group, UC Berkeley Goldman, Cornerstone Research, PACDEV Los Angeles, Marco Fanno Alumni Conference Torino, Workshop Public Administration Hohenheim, NEUDC Tufts
2024 and before: Novafrica Lisbon, Northwestern Development Seminar, DEVPEC Stanford, EGI Bari

Relevant Past Position

Research Assistant, Ameet Morjaria, Northwestern University, USA	2023
Research Assistant, GPRL, Northwestern University, Winneba, Ghana	2022
Research Assistant, Seema Jayachandran, Northwestern University, USA	2021-2022
Research Fellow, University of Bologna, Italy	2018-2019
Research Assistant, Matteo Cervellati and Paolo Masella, University of Bologna, Italy	2018

Teaching Experience

Teaching Assistant, Northwestern University	2020-2024
Statistical Decision Analysis, Executive MBA (6X)	
Global Initiatives in Management: China-Africa, MBA	
Economic Development in Africa, U	
Introduction to Econometrics, U	
Teaching Assistant, University of Bologna	2018-2019
Statistics, MA	
Applied Econometrics, MA	
Economic Growth, MA	

Professional Activities	CEGA Fellow PhD Peer Mentor, Northwestern University	2023
	Applied Microeconomics Lunch seminar organizer, Northwestern University	2021-2022
	Northwestern Graduate Mentorship Program Mentor	2020-2023
